OBJECTIVE

Fullstack Developer with over 1.5 years of experience in developing web applications and ERP systems. Hands-on experience with ReactJS, Next.js, NestJS, and Odoo through projects in the education, healthcare, and transportation industries.
Seeking to continue growing as a Fullstack Developer by contributing to the development of high-impact software products across both frontend and backend. Committed to continuously enhancing technical expertise in system design, development, and optimization to deliver scalable and maintainable solutions.

EDUCATION

August 2022 - April 2026

CAN THO UNIVERSITY | **Software Engineering**

GPA: 3.55 / 4.0

WORK EXPERIENCE

03/2026 - 06/2026

BMS Tech | **Fresher Odoo Developer**

- Developed the **school_helpdesk** module on Odoo 17 to digitize ticket intake and processing workflows within educational institutions, including ticket lifecycle management, assignment, and status tracking.
- Developed the **school_kiosk** module, a touchscreen kiosk SPA that allows students to access class schedules, examination schedules, honor boards, news updates, and submit feedback.
- Built custom website snippets for Odoo Website, enabling drag-and-drop page building with reusable components.
- Developed user interfaces for the company's products, including **DOKO** and **DOKO Kiosk**, as well as client websites such as Bạch Bằng Club (Hải Phòng), JSC 34, and Hoàn Hảo Clinic.

Technologies: Python, Odoo ORM, XML/QWeb, OWL.js.

09/ 2025 - Present

TekNix Corporation | **Frontend Intern**

- Developed and maintained responsive websites for approximately **60 international dental clinics and dentists** using **ReactJS**, **Next.js**, and **WordPress**.
- Built user-friendly interfaces to showcase clinic services, dental teams, and online appointment booking features.
- Improved user experience by optimizing responsive layouts, page performance, and navigation flows across devices.
- Integrated frontend applications with **REST API** and collaborated with backend systems for data handling and authentication.

- Contributed to internal projects using **Framer**, creating interactive UI components and rapid prototypes to support faster development cycles.

Technologies: ReactJS, Next.js, WordPress, Tailwind, REST API, Framer, SEO.

06 / 2025 - 08 / 2025 **Green Space Solution | Fullstack Intern**

- Designed and optimized the frontend interface for the **Transportation Management System (AutoTMS)**, focusing on performance and scalability.
- Implemented UI features for key modules including **Group Management, Vehicle Management, and Vehicle Maintenance Workflow**.
- Integrated frontend components with backend services built on **NestJS, Strapi, Prisma ORM** and **GraphQL**, ensuring accurate and consistent data rendering.
- Collaborated in code reviews to improve code quality, maintainability, and team development standards.

Technologies: Next.js, Hero UI, REST API, NestJS, Strapi, Prisma ORM, GraphQL

06 / 2024 - 04 / 2025 **UTA Co., Ltd. | IT Intern**

- Developed and optimized frontend interfaces for internal web applications using **ReactJS** and modern UI practices.
- Built the frontend for an **AI-based pest diagnosis system (PagoSolution)**, integrating model results into the user interface.
- Improved UI performance and responsiveness, reducing load time and enhancing user interaction.
- Designed and implemented responsive UI for the **IECES project**, ensuring cross-device compatibility.
- Collaborated with backend services built with **NestJS** to consume APIs and handle application data.

Technologies: ReactJS, NestJS, REST API, PhoBERT, Tailwind CSS, WordPress

SKILLS

- **Frontend:** ReactJS, Next.js, WordPress, Redux Toolkit, Zustand, Tailwind CSS, Shadcn/UI, Responsive Design, UI/UX Best Practices, OWL.js
- **Programming Languages:** JavaScript, TypeScript, Python, PHP,XML.
- **AI-assisted Development:** GitHub Copilot, ChatGPT, Claude.
- **Backend:** RESTful APIs, NestJS, JWT Authentication, OAuth 2.0, PostgreSQL, TypeORM, Odoo(17,18,19).
- **Tools & Workflow:** Git, GitHub, Gitlab, Postman, Vercel, DBeaver VS Code, Framer, Google Colab.
- **Soft Skills:** Communication, Teamwork, Problem Solving, Reporting, Team Leadership.

PROJECTS

05/2026 - 06/2026 **DOKO – BMS Tech | Odoo Developer**

Overview: Independently developed two modules within the DOKO school management platform built on Odoo 17, including a helpdesk system and an information kiosk for students.

- **Developed the school_helpdesk module:** Manage ticket intake and processing workflows, including ticket lifecycle management, assignment, access control, and status tracking using Python, Odoo ORM, and XML/QWeb.
- **Developed the school_kiosk module:** Touchscreen SPA built with OWL.js, allowing students to access class schedules, examination schedules, honor

boards, school news, and campus maps.

Technologies: Odoo 17, Python, OWL.js, JavaScript, XML, PostgreSQL, SCSS.

02/2026 - 03/2026

DevoseCare Dashboard - TekNix Corporation | Frontend Developer

Overview: The DevoseCare Dashboard is an internal management platform for medical centers, featuring a drag-and-drop Kanban interface for appointments and robust administrative tools for customer and role-based management, built with ReactJS and Shadcn/UI.

- **Project Initialization & Configuration:** Architected the project structure and established development workflows and environment settings.
- **Booking & Scheduling Management:** Developed a comprehensive dashboard to manage booking workflows (synchronized from mobile and web) featuring a drag-and-drop Kanban interface for appointment status transitions.
- **Customer Management :** Built a robust customer management system and detailed user profile modules.
- **Custom CMS Development:** Engineered a Content Management System (CMS) to dynamically manage mobile app UI elements and healthcare service listings.

Link demo: https://devoscare-dashboard.blocktrend.xyz/

Technologies: ReactJS, Vite, Tailwind CSS, Shadcn UI, UseQuery, Zustand, Dnd-kit, Axios, React Hook Form, Zod.

04/2025 - 08/2025

E-commerce Farm Platform (Bachelor's Thesis) | FullStack Developer

Overview: The E-commerce Farm Platform is a comprehensive agricultural marketplace that integrates a full-stack web application with an AI-powered diagnostic tool, utilizing a fine-tuned PhoBERT model to identify over 350 plant diseases with 97% accuracy.

- Developed responsive and user-friendly web interfaces using **Next.js, ReactJS, Tailwind CSS, and Shadcn/UI**.
- Implemented state management with **Redux Toolkit** to handle product listings, orders, and user interactions efficiently.
- Integrated frontend with **REST APIs**, handling authentication, authorization, and data flow between frontend and backend systems.
- Collaborated with backend services built using **NestJS** and **PostgreSQL** to ensure consistent data rendering and system reliability.
- Focused on clean frontend architecture and performance optimization for scalable e-commerce features.
- Developed a cross-platform mobile application using **Flutter**, reusing API logic and applying **Clean Architecture** principles to ensure maintainability and scalability.

Achievement: Final Thesis Score: **9.9 / 10**
